Footprints in the Sands of Time Dec 09 2020 One of ten children, born in 1924 in a little Dutch town close to the German border, Hank OpdenDries grew up in a world surrounded by farms and wooded hills, a life much in contrast to the fast-paced world we understand, where the simple appearance of a car would be met with fascination by an entire village; the most common mode of transport at that time being the horse. As the hungry thirties set in, rumors of war precipitated by Hitler's Germany threatened to turn Hank's world upside down. When the invasion came, his world was transformed forever. Witnessing firsthand the German invasion of his homeland, Hank soon found himself, along

with many other able-bodied Dutchmen, forced to work in the Ruhr to help the German war effort. Escaping back to the Netherlands, Hank went underground with a number of his friends, remaining in occupied Holland for the duration of the war. Helping to shelter a down British airman (who eventually escaped using the Dutch rail network while still dressed in his RAF uniform), Hank also saw Hitler's infamous V-2 rockets take flight, along with the Nazi's sadistic treatment of Holland's Jewish population. Liberated from German occupation by Canadian soldiers in 1945, three years later, Hank found himself starting a new life as an immigrant to Canada. Vividly retold, Hank's story is one of survival and resistance in a time of unprecedented violence and treachery. His story is about not only tragedy but also heroism. In short, it is the story of Holland in the Second World War and one man's determination to build a new life for himself in the country that gave him his freedom.

When the Sahara Was Green Jan 28 2020 The little-known history of how the Sahara was transformed from a green and fertile land into the largest hot desert in the world The Sahara is the largest hot desert in the world, equal in size to China or the United States. Yet, this arid expanse was once a verdant, pleasant land, fed by rivers and lakes. The Sahara sustained abundant plant and animal life, such as Nile perch, turtles, crocodiles, and hippos, and attracted prehistoric hunters and herders. What transformed this land of lakes into a sea of sands? *When the Sahara Was Green* describes the remarkable history of Earth's greatest desert—including why its climate changed, the impact this had on human populations, and how scientists uncovered the evidence for these extraordinary events. From the Sahara's origins as savanna woodland and grassland to its current arid incarnation, Martin Williams takes us on a vivid journey through time. He describes how the desert's ancient rocks were first fashioned, how dinosaurs roamed freely across the land, and how it was later covered in tall trees. Along the way, Williams addresses many questions: Why was the Sahara previously much wetter, and will it be so again? Did humans contribute to its desertification? What was the impact of extreme climatic episodes—such as prolonged droughts—upon the Sahara's geology, ecology, and inhabitants? Williams also shows how plants, animals, and humans have adapted to the Sahara and what lessons we might learn for living in harmony with the harshest, driest conditions in an ever-changing global environment. A valuable look at how an iconic region has changed over millions of years, *When the Sahara Was Green* reveals the desert's surprising past to reflect on its present, as well as its possible future.

The Making of Prince of Persia Nov 07 2020 The creator of one of the most innovative and best-selling video games of all time gives an unvarnished look into the process in this one-of-a-kind compilation. Before *Prince of Persia* was a best-selling video game franchise and a Disney movie, it was an Apple II computer game created and programmed by one person, Jordan Mechner. Mechner's candid and revealing journals from the time capture the journey from his parents' basement to the forefront of the fast-growing 1980s video game industry... and the creative, technical, and personal struggles that brought the prince into being and ultimately into the homes of millions of people worldwide. Now, on the 30th anniversary of *Prince of Persia*'s release, Mechner looks back at the journals he kept from 1985 to 1993, offering new insights into the game that established him as a pioneer of cinematic storytelling in the industry. This beautifully illustrated and annotated collector's edition includes: 300 pages of Jordan's original journals, Present-day margin notations by Jordan adding explanation, context, and affectionate cartoons of real-life characters, Archival visuals illustrating the stages of the game's creation, Work-in-progress sketches, rotoscoped animation, screen shots, interface design, memos, and more, A full-color 32-page "Legacy" section in which Jordan and fans share *Prince of Persia* memories from the past 30 years, including the Ubisoft games and Disney movie. *The Making of Prince of Persia* is both a tribute to a timeless classic, and an indelible look at the creative process that will resonate with retro-gaming fans, game developers, and writers, artists, and creators of all stripes.

Beneath the Sands of Time Apr 12 2021 The poetry of Jody Cooke while greatly varied and at times seemingly unfocused in theme is a wonderful read and filled with rich emotional commentary. From man's base desires and carnal hunger to the more brutal aspects of rage, obsession, and the

need for violence. Mr. Cooke takes a deep look into man's heart and pulls out the things we all try so desperately to hide. In other works he explores more romantic themes such as love, family, and the untamed wilds of our deepest imagination. Contained within this book are many such pieces. A body of work that is the result of a lifetime of creation. Here is a brief examination of a few of my favorites.

Sands of Time Aug 05 2020 The Sands of Time takes readers on a wild ride through the century of action, from the first makeshift race in 1903 to the incredible panorama of the 2003 Daytona 500. Each aspect of the story is accented with colorful anecdotes, featuring the cultured drivers of the early 1900s, jauntily racing against the clock in immaculate uniforms and scarves waving in the breeze, to the roughnecks from the Southern woods, who found themselves in jail as often as Victory Lane, to today's famous athletes who dare the famed high banks at speeds close to 200 mph. Each chapter also includes additional details on such topics as women drivers, sponsors and prize money, as well as origin of race flags, development of tires and the sites of forgotten tracks. The book is extensively illustrated with rarely seen photos drawn from ISC Publications Archives, the largest single collection of race photos in the world.
