Developed as both an air superiority fighter and a long-range naval interceptor, Grumman's F-14 Tomcat was the U.S. Navy's primary fighter from 1974 until 2006. Over 700 were built. The F-14 flew its first combat missions shortly after its initial deployment in late 1974, flying in support of the American

withdrawal from Saigon. In 1981 it drew first blood, as two F-14s from VF-41 downed two Libyan Su-22s. The plane compiled a notable combat record for the United States in both Gulf Wars and NATO actions in Bosnia. Planes sold to the Shah of Iran prior to his ouster remain the last F-14s in active service, as the U.S. Navy retired it in October 2006. This F-14 pilot's flight operating handbook was originally produced by the U.S. Navy. It has been slightly reformatted but is reproduced here in its entirety. It provides a fascinating view inside the cockpit of one of history's great planes. **CRITICAL THINKING: A USER'S MANUAL** offers an innovative skill-based approach to critical thinking that provides step-by-step tools for examining arguments.
