Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. Law of Persons Mar 30 2020 "The law of persons is a dynamic area of the law, and it is this dynamic nature that generates interest in this subject and makes it stimulating to teach and learn. Law of Persons seeks to make this subject area accessible to students, including first-year students. In the law of persons, the common law and legislation have been harmonised with the spirit, purport and objects of the Bill of Rights, while the values entrenched in the Constitution are permeating every area of the law. The greatest change in our law of persons to date has been the Children's Act 38 of 2005: it had redefined basic concepts, it has revolutionised the parent-child relationship, it has ended the labelling of children in terms of their parents' marital status and it has radically altered the legal status of unmarried fathers. Law of Persons is also available in Afrikaans, and should ideally be used in conjunction with Personeregbronnebundel / Law of Persons Sourcebook"--Provided by publisher.

Preventing AIDS Jul 03 2020 Public health has a legacy of neglect regarding social and behavioral research. Too often, prompted by technical and scientific progress, we have ignored even marginalized-the vital "human element" in health thinking and practice. Thus, for example, while family planning programs focused on providing a choice among safe and effective contraceptive methods (a supremely worthy goal), the central issue of sexuality and sexual behavior was generally neglected. Similarly, the enormous and important efforts to develop rapid and reliable diagnostic and treatment methods for sexually transmitted diseases helped divert attention away from the crucial issues of sexual practice. In short, we seem to have difficulty addressing the fundamental behaviors-including sex, drug taking and other intoxications, and violence-that are central to the major causes of preventable morbidity, disability, and premature mortality in the world today. Our collective reluctance to examine and understand ourselves is also expressed in the oft-repeated pipedream that scientific progress will "take care of" the HIV / AIDS pandemic by delivering a preventive vaccine, an effective cure, or both. Yet even a cursory glance at the relationship between scientific/ technical progress and health shows that meeting the scientific challenges is only one step toward effective application of the vaccine or drug. It is typical, not atypical, that hepatitis B vaccine is only now becoming relatively freely available to large populations in the developing world, more than a decade after the vaccine's licensure.
