*Develop standardsbased problem solving strategies & skills. Each comprehensive teacher resource contains over 90 task cards, each*

*focused on one problem. The task cards can be used by a whole class, in small groups or individually. The associated activity for each is designed to challenge students to use their acquired problemsolving skills. Detailed teachers' notes provide information on distinct problemsolving strategies, to include: think, estimate & check; draw a diagram or picture; look for patterns; make a model; act out a problem; construct a table or a graph; write a statement; make a list; calculate; and reflect & assess results. The perfect supplement to any math class! Master essential logarithm and exponential skills through helpful explanations, instructive examples, and plenty of practice exercises with answers. Authored by experienced teacher, Chris McMullen, Ph.D., this self-study math workbook covers: logarithms of various bases and natural logarithms, the change of base formula, logarithm rules like the sum and difference formulas, exponential functions, hyperbolic functions and their inverses, graphs of logarithms, exponentials, and hyperbolic functions, a concise review of exponents in the first chapter, Euler's number, applications such as population growth, continuously compounded interest, and radioactive nuclear decays, an introduction to complex numbers in the last chapter, an optional chapter covering the calculus of logarithms, exponentials, and hyperbolic functions. The author, Chris McMullen, Ph.D., has over twenty years of experience teaching math skills to physics students. He prepared this workbook of the Improve Your Math Fluency series to share his strategies for working with logarithms and exponentials.*

*KewlActiveMinds(TM) Workbooks and Practice Worksheets are immersive self-study tools that encourage and stimulate your child's mind, while at the same time letting them have fun learning! Spectrum Math for grade 1 keeps kids at the top of

their math game using progressive practice, math in everyday settings, and tests to monitor progress. The math workbook covers addition, subtraction, composing shapes, comparing numbers, and taking measurements. A best-selling series for well over 15 years, Spectrum still leads the way because it works. It works for parents who want to give their child a leg up in math. It works for teachers who want their students to meet—and surpass—learning goals. And it works to help children build confidence and advance their skills. No matter what subject or grade, Spectrum provides thorough practice and focused instruction to support student success. Developed by an experienced educator and classroom tested for more than a decade, the "I Love Math" program presents a complete elementary math curriculum! Each volume provides an entire year's worth of challenging exercises focused on standardsbased topics. Using engaging color graphics and easytofollow practical lessons, the program is perfect for students of various learning styles and skill levels. The unique learning approach featured in the program furnishes a funfilled means of motivating students to think more deeply, investigate, explain, and understand problemsolving strategies. Each workbook provides completed coverage of the following concepts: whole numbers, patterns & algebra, mass, addition & subtraction, data, time, multiplication & division, length, threedimensional space, chance, volume & capacity, and position. Concepts are divided into two sections one per semester. Each section is two or three pages in length and is followed by an assessment which allows for immediate and continuous feedback. Lesson extensions and suggestions for going forward are also included with each activity. The handson activities can be performed using a variety of commonly available classroom materials.
