The Cumulative Book Index Sep 24 2019 A world list of books in the English language.

Book of Abstracts of the 71st Annual Meeting of the European Federation of Animal Science Mar 30 2020

This Book of Abstracts is the main publication of the 71st Annual Meeting of the European Federation of Animal Science (EAAP). It contains abstracts of the invited papers and contributed presentations of the sessions of EAAP's eleven Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems, Insects and Precision Livestock Farming.

Gender Intelligence Jul 03 2020 World-renowned experts on gender intelligence Barbara Annis and Keith Merron suggest it's time to move beyond arguments based on politics and fairness, building an economic business case for gender diversity in the workplace. Despite forty years of laws, quotas, diversity training and legal expenses aimed toward equalizing pay, opportunities, and working conditions between the sexes, the glass ceiling remains firmly intact. For too long, companies have played the "numbers game"—attempting to tackle gender imbalance by forcing affirmative action policies and numeric standards on organizations to increase the representation of women in management. Yet, these efforts have rarely been sustained. In this groundbreaking comprehensive analysis, based on more than twenty-five years of depth surveys involving 100,000 men and women across dozens of Fortune 500 companies, Barbara Annis and Keith Merron provide a deeper understanding of the multiplicity of forces that have combined to create and perpetuate gender inequality. Gender Intelligence exposes common false assumptions that prevent men and women from successfully performing together at work—myths exacerbated by worn theories of gender blindness and sameness thinking. It shows how a small but growing number of courageous, leading-edge companies have broken through the barriers to successfully advance women, making the remarkable transformation from compliance to choice—from pressure to preference—and how it can be done in any business. Gender Intelligence features 17 illustrations.

The Cambridge Handbook of Cognition and Education Aug 04 2020

This Handbook reviews a wealth of research in cognitive and educational psychology that investigates how to enhance learning and instruction to aid students struggling to learn and to advise teachers on how best to support student learning. The Handbook includes features that inform readers about how to improve instruction and student

achievement based on scientific evidence across different domains, including science, mathematics, reading, and writing. Each chapter supplies a description of the learning goal, a balanced presentation of the current evidence about the efficacy of various approaches to obtaining that learning goal, and a discussion of important future directions for research in this area. It is the ideal resource for researchers continuing their study of this field or for those only now beginning to explore how to improve student achievement.

Platelets May 25 2022 Platelets — winner of a 2013 Highly Commended BMA Medical Book Award for Internal Medicine — is the definitive current source of state-of-the-art knowledge about platelets and the entire field of platelet biology, pathophysiology, and clinical medicine. Recently there has been a rapid expansion of knowledge in both basic biology and the clinical approach to platelet-related diseases including thrombosis and hemorrhage. Novel platelet function tests, drugs, blood bank storage methods, and gene therapies have been incorporated into patient care or are in development. This book draws all this information into a single, comprehensive and authoritative resource. Highly Commended BMA Medical Book Award 2013: Internal Medicine Comprehensive and definitive source of knowledge about platelets for clinicians, pathologists and scientists Integrates the entire field of platelet biology, pathophysiology, and clinical medicine Full color reference comprising 64 chapters, 1400 pages, and 1400 references Contributions from 126 world leaders in their fields New chapters on topics such as the regulation of platelet life span, platelet microRNAs, GPVI and CLEC-2, monitoring of antiplatelet therapy, novel antiplatelet therapy, and making platelets ex vivo

Index Medicus Feb 19 2022

Immunoregulatory Role of Thymic Hormones Oct 18 2021 First published in 1990. This important new text covers a wide area of thymology in both the theoretical and practical aspects. In view of current information, a crucial role of endocrine thymus is presented in the creation, maintenance, and senescence of neuro-endocrine-immune homeostasis. In particular, mechanisms are described (which are basically responsible for the T cell maturation and selection) for the hierarchic organization of the immune system and its thymic dependent immune competence in terms of tolerance and immunity. A detailed presentation of the structure and biological properties of a number of well-defined thymic hormones is included. Their clinical applications and results obtained in inherited or acquired immunodeficiencies and in neoplastic diseases are also reviewed on the grounds of numerous representative clinical trials. A perspective and potential scope of immunorestorative therapy and prevention with thymic hormones and other thymomimetic drugs are outlined. Researchers, practitioners, and students will find this book to be a useful and essential source of information.

Argentina's Partisan Past Dec 08 2020 A challenging study about the production, spread and use of understandings of national history and identity for political purposes in twentieth-century Argentina.

Liver Transplantation Nov 18 2021 This book covers a wide spectrum of topics including, but not limited to, the technical issues in living and deceased donor liver transplant procedures, cell and experimental transplantation, and the complications of liver transplantation. Some of the very important topics, such as the arterial reconstruction in living donor liver transplantation, biliary complications, and the post-transplant-lymphoproliferative disorders (PTLD), have been covered in more than one chapter.

Principles and Practice of Sleep Medicine Oct 06 2020 For nearly 30 years, Dr. Meir Kryger's must-have guide to sleep medicine has been the gold standard in this fast-changing field. This essential, full-color reference includes more than 20 unique sections and over 170 chapters covering every aspect of sleep medicine.

disorders, giving you the authoritative guidance you need to offer your patients the best possible care. Evidence-based content helps you make the most well-informed clinical decisions. An ideal resource for preparing for the sleep medicine fellowship examination. New content on sleep apnea, neurological disorders, legal aspects of sleep medicine, dental sleep medicine genetics, circadian disorders, geriatric women's health, cardiovascular diseases, and occupational sleep medicine, keeps you fully up to date. Updates to scientific discoveries and clinical approaches ensure that you remain current with new knowledge that is advancing the diagnosis and management of sleep disorders.

Practice and Theory in the Italian Renaissance Workshop 2019 Verrocchio worked in an extraordinarily wide array of media and used unusual practices of making to express ideas.

The Inquisitor in the Hat Shop Dec 20 2021 Early modern Venice was an exceptional city. Located at the intersection of trade routes and cultural borders, it teemed with visitors, traders, refugees and intellectuals. It is perhaps unsurprising, then, that such a city should foster groups and individuals of unorthodox beliefs whose views and life styles would bring them into conflict with the secular and religious authorities. Drawing on a vast store of primary sources - particularly those of the Inquisition - this book recreates the social fabric of Venice between 1640 and 1740. It brings back to life a wealth of minor figures who inhabited the city, and fostered ideas of dissent, unbelief and atheism in the teeth of the Counter-Reformation. The book vividly paints a scene filled with craftsmen, friars and priests, booksellers, apothecaries and barbers, bustling about the city spaces of sociability, between coffee-houses and workshops, apothecaries' and barbers' shops, from the pulpit and drawing rooms, or simply publicly speaking about their ideas. To give depth to the cases identified, the author overlays a number of contextual themes, such as the survival of Protestant (or crypto-Protestant) doctrines, the political situation at given time, and the networks of dissenting groups that flourished within the city, such as the 'free metaphysicists' who gathered in the premises of the hatter Bortolo Zorzi. In so doing this rich and thought-provoking book provides a systematic overview of how Venetian ecclesiastical institutions dealt with the sheer diffusion of heterodox and atheistical ideas at different social levels. It will be of interest not only to scholars of Venice, but all those with an interest in the intellectual, cultural and religious history of early modern Europe.

Auto Repair For Dummies Aug 28 2022 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Transactions of the American Society for Neurochemistry Apr 11 2021

The Impact of Caffeine and Coffee on Human Health Feb 28 2020 The purpose of this Special Issue is to provide a thorough and up-to-date presentation of research investigating the impact of coffee and/or caffeine intake on various health outcomes. We welcome the submission of original research articles and systematic Reviews/meta-analyses focusing on several aspects of coffee/caffeine intake in relation to health. Areas of interest include, but are not limited to, the following topics: - Human clinical trials of

coffee or caffeine use in relation to disease or intermediate phenotypes. - Epidemiological studies of habitual coffee or caffeine intake in relation to human health, among the general public, as well as, among special populations (i.e., children, pregnant women, diabetics, cancer patients, hypertensives, etc.) - Mechanisms of action of nutrients and other bioactive components of coffee/caffeine. - Studies integrating genetic or physiological markers of coffee/caffeine intake to investigations of coffee and health.

Weedon's Skin Pathology E-Book | 15 | 2021 Encyclopedic and authoritative, Weedon's Skin Pathology has earned outstanding reviews and accolades from practicing and trainee dermatopathologists, general pathologists, and dermatologists worldwide. The 5th Edition continues the tradition of excellence, helping you accurately and efficiently sign out challenging skin cases in everyday practice, while also keeping you up to date with recent advances in the field. This single-authored text provides comprehensive coverage of the full spectrum of dermatopathological entities, both inflammatory and neoplastic, highlighted by more than 1,200 large-sized, high-quality illustrations. Helps you arrive at the most accurate diagnoses possible by demonstrating what is seen through the microscope and identifying the characteristic features of each lesion – for established disorders, unusual and rare disease entities, and incompletely defined entities. Includes updated and expanded information on molecular diagnostics, including FISH (fluorescence in situ hybridization) techniques, plus new developments in molecular biology and molecular techniques, targeted personalized medicine, and immunohistochemistry. Brings you fully up to date with carefully reviewed and streamlined introductory and basic science information and information on new entities since the previous edition. Presents even more key information in quick-reference formats such as tables and boxes that organize diseases into groups, synthesize diagnostic criteria, and list differential diagnoses. Identifies key important articles and more rare and unusual reports with remarkably authoritative, comprehensive, current, and relevant reference lists (over 35,000) for each entity.

Biomedical Index to PHS-supported Research | 26 | 2019

The Brain and Host Defense | 11 | 2021 It is now well recognized that the brain, and especially the hypothalamus, plays an important role in the regulation of immune reactions and inflammation. This book aims to review our current state of knowledge of this important field. Key historical findings are presented and the reciprocal interactions between the brain and the immune system are examined. Particular emphasis is placed on inflammation, a critical host defense reaction that serves as an effector response for both the adaptive and innate immune systems. Mechanisms implicated in brain defense, as well as in general host defense, are discussed. The regulatory influences of the brain on inflammatory responses are included with particular reference to the role of the hypothalamus, which is also the main director of the hormonal regulation of immune/inflammatory. Gender-related differences in immune responsiveness, circadian modulator of immune responses, and evidence that behavioral conditioning (e.g. reward) of immune responses is possible are used as examples to reinforce the notion that the neuroendocrine system exerts a fundamental and complex regulatory influence on the immune system. * Presents timely issues such as immunological aspects of the blood-brain-barrier and the role of inflammatory mediators in the evolution of strokes and degenerative diseases * Includes analysis of the role of the brain in the adaptive responses to disease * Evaluates the argument that further knowledge of the influence of the brain on the immune system will provide new insights to the pathophysiology of infectious and autoimmune diseases

Pesticides Documentation Bulletin | 13 | 2021

Feed Additives | 28 | 2022 Feed Additives: Aromatic Plants and Herbs in Animal Nutrition and Health explores the use of aromatic plants and their extracts, including essential oils in animal nutrition. It provides details about the development of bacteria resistance to antibiotics. All chapters provide a holistic approach on how aromatic plants can provide an efficient solution to animal health, also covering the categories of animals, including poultry, pigs, ruminants and aquaculture. This book represents an up-to-date review of the existing knowledge on aromatic plants, both in vitro and in vivo and the basis for future research. Covers different categories of animals and novel feed trends with functional properties Examines a variety of natural sources based on plant functional substances to promote antioxidant, antimicrobial, antiviral, anti-inflammatory properties and digestive stimulations Explores the chemistry and mechanisms of action of plant extracts in animal nutrition Includes sustainable solutions for the use of natural additives

as growth promoters

Handbook of Neurochemistry and Molecular Neurobiology 09 2021 "This volume is intended to provide state-of-the-art and the most up-to-date knowledge on the mechanisms of neuronal death and repair after stroke." -- Preface.

Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1986 2020

Scientific and Technical Aerospace Reports 25 2022 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Intelligent Tools for Building a Scientific Information Platform: From Research to Implementation 30 2022 This book is a selection of results obtained within three years of research performed under SYNAT, a nation-wide scientific project aiming at creating an infrastructure for scientific content storage and search for academia, education and open knowledge society in Poland. The book is intended to be the last of a series related to the SYNAT project. The previous books, titled "Intelligent Tools for Building a Scientific Information Platform" and "Intelligent Tools for Building a Scientific Information Platform: Advanced Architectures and Solutions", were published as volumes 390 and 467 in Springer's Studies in Computational Intelligence. Its contents is based on the SYNAT 2013 Workshop held in Warsaw. The papers included in this volume present an overview and insight into information retrieval, repository systems, text processing, ontology-based systems, text mining, multimedia data processing and advanced software engineering, addressing the problems of implementing intelligent tools for building a scientific information platform.

Molecular and Cellular Biology of Cytokines 27 2020 Cytokines are regulatory polypeptides synthesized by a variety of cells in response to injury, inflammation or infection and which act on different tissues by changing gene expression and cellular metabolism. This book provides the results from recent *in vitro* studies of the structure and function of various cytokines. It offers an up-to-date overview of the advances in cytokine research, including research developments dealing with colony stimulating factors, interferons and growth and differentiation factors - as well as classical hormones such as insulin, neurokinin, somatomedin and parathormones. Several newly identified cytokine receptor structures are also discussed, as are certain activities of the recently discovered 8,000-10,000 m.w. cytokine family.

Biomedical Research Technology Resources 16 2021

Pediatric Allergy, Asthma and Immunology 06 2020 Easy to understand and easy to use, this essential book reflects the rapid progress in one of the most intriguing fields of medicine. It offers state-of-the-art information on basic immunology, fetal-neonatal immunology, and many more fascinating areas.

The Art of Focused Conversation 28 2019 The best 'how-to' for encouraging consensus in firms and organizations. Communication within many organizations has been reduced to email, electronic file transfer, and hasty sound bytes at hurried meetings. More and more, people appear to have forgotten the value of wisdom gained by ordinary conversations. The Art of Focused Conversation convincingly restores this most human of attributes to prime place within businesses and organizations, and demonstrates how it can be accomplished through the medium of focused conversation. Developed, tested, and extensively used by professionals in the field of organizational development, The Art of Focused Conversation is an invaluable resource for all those working to improve communications in firms and organizations.

The Oxford Handbook of Adult Cognitive Disorders 07 2021 The prevalence of adult cognitive disorders will dramatically rise over the next 25 years due to the aging population. Clinical research on adult cognitive disorders has rapidly evolved, including evidence of new adult cognitive disorders and greater insight into the clinical presentation, mechanism, diagnosis, and treatment of established disorders. The Oxford Handbook of Adult Cognitive Disorders is an up-to-date, scholarly, and comprehensive volume covering most diseases, conditions, and injuries resulting in impairments in cognitive function in adults.

Topics covered include normal cognitive and brain aging, the impact of medical disorders and psychiatric illnesses on cognitive function, adult neurodevelopmental disorders, and various neurological conditions. This Handbook also provides a section on unique perspectives and special considerations for clinicians and clinical researchers, covering topics such as cognitive reserve, genetics, diversity, and neuroethics. Readers will be able to draw upon this volume to facilitate clinical practice (including differential diagnosis, treatment recommendations, assessment practices), and to obtain an in-depth review of current research across a wide spectrum of disorders, provided by leaders in their fields. The Oxford Handbook of Adult Cognitive Disorders is a one-of-a-kind resource appropriate for both clinicians and clinical researchers, from advanced trainees to seasoned professionals.

Oogenesis Sep 16 2021 Oogenesis - the process by which female germ cells develop into mature eggs, - is a complex process involving many important elements of developmental and cellular biology: from cell interactions, complex signalling cascades, specialized cell cycles and cytoskeleton organization. Oocytes from various species (including clam, starfish, xenopus and mouse) are excellent model systems to study the biochemistry of cell division with important implications for basic and clinical research. This book describes the entire process of oogenesis in chronological order with contributions from leading international researchers and chapters covering medical and ethical considerations in oogenic biology. Topics include sex determination and gonadal development, control of meiotic chromosome pairing and homologous recombination, control of meiotic divisions and the remodelling of the oocyte into a totipotent zygote as well as medically-assisted reproduction. This volume is an essential resource for all students, researchers and clinicians in developmental and reproductive biology. Key features: Reaches beyond the study of simply meiosis to cover all aspects of oogenesis Synthesizes recent advances in the field, drawing studies from different model species Chapter sequence designed to follow the time line in vivo Written by an international panel of expert researchers
